Profile Summary

Full-stack developer focused on React + PostgreSQL/Supabase, with an AI-powered workflow (Claude Code/Design for development and design). I keep AgenHub in production, a multi-tenant booking SaaS with Row Level Security, realtime, PWA and 170+ versioned deploys. Previous experience with Java (Spring Boot) in an academic project and Python automations in industry. Looking for a junior opportunity to grow within a strong technical team.

Hard-skills

- React + Vite
- PostgreSQL / Supabase
- JavaScript
- APIs REST
- Java / Spring Boot
- Python
- Claude Code/Design

Soft-skills

- Communication: clarity with users and the technical team
- Problem Solving: focused on practical solutions
- Organization: process management and documentation
- Teamwork: multidisciplinary collaboration
- Eagerness to Learn: constantly chasing knowledge
- Multitasking: juggling multiple demands

Relevant Experience

AgenHub – Full-Stack SaaS Project

 Jan 2026 - Present

Development of a multi-tenant SaaS platform for booking management: admin panel, client and service registration, real-time schedule, subscription plans and notifications. Built with React (Vite), PostgreSQL, REST APIs, Supabase Auth and continuous deployment on Vercel.

AssisConnect – Full-Stack Academic Project

 Jan 2024 - 2025

Development of a web system to manage a nursing home: dashboard, records, reports and authentication. Built with Spring Boot (REST API), Java, PostgreSQL, SQL and TailwindCSS.

Automation Analyst – Interart Estamparia

 Jan 2019 - 2026

Responsible for developing automations with Python, CorelDRAW and PyAutoGUI to streamline internal processes, cut manual tasks and significantly increase productivity. The solutions raised print production by about 150%. Also worked on interfaces, visual flows and graphic materials used by the company.

Education

- University of Fortaleza (UNIFOR)
Systems Analysis and Development
2024 - 2026.2 (In progress)
